

2015 International Conference on Molecular Oncology 'From Signal Transduction to Cancer Precision Medicine'

June 6th-7th, 2015 - Candiolo Cancer Institute, Italy

Invited Speakers

Ido Amit, Rehovot, Israel
Mariano Barbacid, Madrid, Spain
Alberto Bardelli, Candiolo, Italy
Walter Birchmeier, Berlin, Germany
Johanna Chiche, Nice, France
Paolo Comoglio, Candiolo, Italy
Michele De Palma, Lausanne, Switzerland
Annika Fendler, Berlin, Germany
Douglas Hanahan, Lausanne, Switzerland
Carl Henrik Heldin, Uppsala, Sweden
David Livingston, Boston, USA
Daniel Louvard, Paris, France
Kristian Pietras, Lund, Sweden
Jacques Pouyssegur, Nice, France
Joseph Schlessinger, New Haven, USA
Tuomas Tammela, Cambridge, USA
Livio Trusolino, Candiolo, Italy
Yosef Yarden, Rehovot, Israel

Topics

In the past 30 years, basic research in disciplines such as cell biology and genetics has provided invaluable insights into the regulatory circuits that govern tumor onset and progression. Capitalizing on this wealth of information, molecular oncology is now revolutionizing the way we diagnose and treat cancer and offers unprecedented opportunities to improve the outlook of cancer patients on a rational basis.

The objective of the meeting is to unite eminent late-career scientists and outstanding young investigators for parallel presentations of seminal discoveries and new horizons in the fields of oncogenic signaling and cancer precision medicine.

The program will include a session of selected posters

Deadlines and Fees

Application and Abstract Submission: April 20th, 2015
Payment of registration fee: May 11th, 2015
Academic and Research Institutes: € 200
Industry: € 400
Waived for Students in Training (status to be certified)
