

Comprehensive Flow Cytometry Course

July, 15th - 17th

Turin, Italy

Hosted by the Molecular Biotechnology Center

INSTRUCTORS

Derek Davies

derek.davies@cancer.org.uk

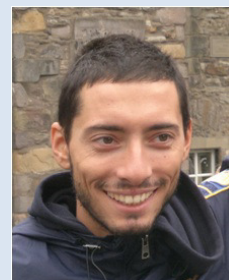

London Research Institute, UK

Jean-François Mayol

jean-francois.mayol@tcbiosciences.com

TransCure BioServices, France

Andrea Valle

andrea@floocyte.com

FloCyte Team, Italy

Organized by FloCyte Europe

Course coordination: Andrea Valle (andrea@floocyte.com)

and Helene Dujardin (helene@floocyte.com)

Course Information

Course settings

Two experts in the cytometry field will teach this course: Derek Davies, FACS Manager at the London Research Institute, UK and Jean-François Mayol, R&D and Cytometry head at Transcure Bioservices, France.

The course is organized as an alternation of lectures and interactive workstations. Although this is not a hands-on course, it will involve your active participation.

FloCyt courses are often supported by different cytometers, reagents and software manufacturers. Our courses are applicable to any instrument and you will learn how to get the most of your flow cytometry experiments whatever system you have.

Participants

Any scientist (researchers, medical doctors, technicians, engineers, students...) with experience in biology-related field and a good laboratory practice. No experience in flow cytometry is required, the participants expected level will range from beginners to experienced users. This course is configured to give you the possibility to join for 2 or 3 days, depending on your level and your training needs.

Course location, date and time schedule

Molecular Biotechnology Center (MBC), Via Nizza, 52 - 10126 Torino, Italy.

From Wednesday July 15th to Friday July 17th 2015 - 9am to 5pm

More about FloCyt

FloCyt is providing flow cytometry courses around the world since 2003. Don't hesitate to go to FloCyt website to get a presentation of the team and teachers and to see other FloCyt courses.

Please contact us for any question you may have on the course or registration:

- Website: www.flocyte.org
- European coordinators: helene@flocyte.com and andrea@flocyte.com

Course Registration

Registration prices until 12th of June 2015!

(late fee of €100 will be applied after this date)

This course is configured to give you the possibility to Join for 2 or 3 days, depending on your level and your training needs:

Day 1-2-3 Comprehensive Flow Cytometry • €590 + VAT*

all 3 days – to cover all critical flow topics - for beginners needing to do more than 2-3 colors experiments or for intermediate users who wants to refresh their theoretical knowledge.

Day 1-2 Foundational Flow Cytometry • €420 + VAT*

2 first days – for beginners who will not need to do more than 2-3 colors experiments.

Day 2-3 Principals of Flow Cytometry • €420 + VAT*

2 last days – for intermediate level users who need a better understanding of compensation and multiparametric panels design.

* For private individual registrants, 20% VAT (VAT for France) will be added to the invoice. For institution providing a EU VAT number, no VAT will be charged on the invoice, VAT from the institution place of establishment must be processed by reverse charge mechanism.

The course fee includes one person registration, coffee breaks and lunches. It does not include travel and accommodation.

Registration is organized by HCD bioexpert - 2 rue Sarrazin - Nantes 44000 - France. 518 520 572 RCS Nantes - VAT number: FR82518520572. For any question, please contact Helene at helene@flocyte.com
Registration application through FloCyte website: www.flocyte.com/registration-application-europe
