

OSPEDALE SAN RAFFAELE
ISTITUTO DI RICOVERO E CURA A CARATTERE SCIENTIFICO

Postdoctoral position in neuroscience available in the Unit of Neuropsychopharmacology of the San Raffaele Scientific Institute in Milan (Italy)

Starting date: July 1st, 2019

The project aims at generating mechanistic understanding of the effects of proinflammatory cytokines on neuronal function, with implications for neurological and psychiatric disorders (e.g. multiple sclerosis, depression). Research activity will be based at the Division of Neuroscience of the San Raffaele Scientific Institute in Milan. The post-doc will benefit from a dynamic and collaborative research environment and access to state-of-the-art research facilities.

We seek a highly-motivated and autonomous postdoc with PhD level background in biology, medicine, biotechnology, pharmacy or related disciplines. Hands-on experience of cellular and molecular biology techniques as well as of handling of laboratory animals is required.

Please send a full CV, a brief motivation letter as well as contact details for two referees to valtorta.flavia@hsr.it

Please forward this email to potentially interested candidates.
