GENERAL INFORMATION

Cogentech S.r.l. is an IFOM Benefit Corporation whose objective is to provide technological services related to the new perspectives offered by the advent of post-genomics. The services offered by Cogentech are aimed both at the scientific community engaged in research activities and at hospitals intending to use these technologies for diagnostic purposes.

Cogentech is controlled by IFOM ETS, a private research institute operating at the forefront of basic and translational cancer research. Collaboration with IFOM ensures that the services provided by Cogentech are state of the art.

Cogentech has been operating in the field of genetic testing for hereditary cancers since 2011 and processes more than 1,700 analyses per year using its proprietary NGS panels, OncoPan and OncoPed.

Cogentech invests more than 20% of its annual expenditure budget in Research and Development to develop new innovative diagnostic tools and devices and to maintain its competitive role in the market.

Cogentech is committed to creating a safe and inclusive environment based on mutual respect and the appreciation of diversity, offering equal employment opportunities to all qualified individuals.

We are recruiting for our company

JOB TITLE

Lab Technician | Maternity cover

ABOUT THE POSITION

The Proteomics & Metabolomics Unit invites applications for a technician to support research and development activities. The Unit is equipped with cutting-edge technologies and provides a comprehensive infrastructure for the identification, characterization, and quantification of proteins, metabolites, and lipids, supporting both internal and collaborative research activities.

Candidate will be responsible for:

- Preparing samples for proteomics (metabolomics and lipidomics if needed) analysis according to established and internal protocols.
- Maintenance of LC-MS/MS equipment, including maintenance operations: MS calibration, troubleshooting and mobile phases preparation.
- Perform LC-MS/MS analysis of proteomics samples.
- Post-acquisition data analysis with available softwares, including statistical analysis.
- New methods and protocols development (e.g Single Cell proteomics)

QUALIFICATION

- Hands-on experience with mass spectrometry.
- Proven knowledge of LC-MS-based omics workflows
- Bioinformatic & omics data analysis
