

EpigeneticSeq Workshop

Practical Introduction on ChIP-seq and Bisulfite-seq Data Analysis
20-22 May 2015

In the last decade, genome-wide approaches have become key tools toward the comprehension of genome's structure and gene regulation. With the advent of high-throughput sequencing technologies, the amount of today available genome-wide data is impressive, and constantly growing, but this growth is not efficiently counterbalanced by efficient data analysis.

After the success of the first edition, the Human Genetics Foundation (HuGeF) is proud to announce the second edition of the EpigeneticSeq Workshop 2015, a practical course on ChIP-seq and Bisulfite-seq data analysis.

Short program:

Wednesday:

14:00 - 18:30 *Introduction on Next-Gen Sequencing applications and analysis softwares*

Thursday:

09:00 - 13:00 *Practical course on ChIP-seq analysis for beginners*

14:00 - 18:00 *Interpretation and representation of ChIP-Seq data*

21:00 *Social dinner*

Friday:

09:00 - 13:30 *Practical course on Bisulfite-seq analysis for beginners*

Via Nizza 52 • Torino • Italy • 10126 • Phone (+39) 011-6709531
