

Laboratory: Host-pathogen Interaction during Lentiviral Infection

Director of research: Andrea Cimorelli

International Center of Research in Infectiology (CIRI)

Lyon

France

Post doctoral fellowship: Cell Biology of HIV Infection

Our laboratory is actively seeking for one highly motivated post doctoral candidate to work on the cell biology of human immunodeficiency viruses (HIVs) infection

The candidate should possess prior experience in cell biology and/or virology and should be able to conduct his/her research independently.

The salary will depend on previous experience.

The laboratory is hosted within the CIRI, a novel institute in Lyon-France, dedicated to research in infectious diseases.

Candidates should visit our homepage (<http://ciri.inserm.fr/en/les-equipes/teams-2/host-pathogen-interaction-during-lentiviral-infection/themes-research/>) and send their application, as well the name of potential referees to the following address:
